

WE CLAIM:

1 1. A blister pack comprising:

2 a main sheet unitarily formed with an array of pockets
3 each dimensioned to receive a respective object;

4 a frangible foil overlying a front face of the sheet
5 and closing the pockets, whereby objects in the pockets are
6 hermetically sealed therein by the foil;

7 a pair of guides unitarily formed with the main sheet
8 and flanking the array of pockets;

9 a protective panel having an array of holes
10 substantially identical to the array of pockets, overlying the
11 foil, and slidable in a direction in the guides between a rest
12 position with the holes at least partially offset from the
13 pockets and the panel blocking the pockets and a dispensing
14 position with the holes aligned with the pockets, whereby in the
15 dispensing position the objects can be pressed from the pockets
16 through the foil and holes; and

17 a spring web unitarily formed with the sheet and with
18 the panel and urging the panel into the rest position.

1 2. The blister pack defined in claim 1 wherein the
2 spring web, panel, and sheet are of the same material and
3 thickness.

1 3. The blister pack defined in claim 2 wherein the
2 spring web has a pair of flat portions having outer edges joined
3 to the panel and sheet and inner edges joined to each other.

1 4. The blister pack defined in claim 2 wherein the
2 material is plastic.

 5. The blister pack defined in claim 1 wherein the
guide is a pair of inwardly bent lips formed at longitudinal
edges of the sheet
